OBJECTIVE

Computer Science and Engineering student at Daffodil International University with a strong background in competitive programming, mentoring, contest management, and software development. Experienced as a Lab Prefect, Problem Setter, and Judging Director, with hands-on experience leading academic projects and supporting programming communities.

EDUCATION

Daffodil International University (DIU)
B.Sc. in Computer Science and Engineering (CSE)
CGPA: 3.87 out of 4.00

Ashulia, Dhaka
Expected Graduation: 2027

ACADEMIC & CONTEST MANAGEMENT EXPERIENCE

Lab Prefect – Programming for Problem Solving (PPS) 2024 – Present
Daffodil International University (DIU) Ashulia, Dhaka

- Help manage lab classes and guide junior students in C and C++ through hints that encourage independent problem solving.
- Explain recursion, pointers, and fundamental programming concepts using simple beginner-friendly examples.

Problem Setter & Judging Director – DIU ACM Lab 2024 – Present
Daffodil International University (DIU) Ashulia, Dhaka

- Create, test, review, and validate programming contest problems and assist with judging workflows.
- Set problems for the Take-Off Programming Contest and Unlock The Algorithm and contribute to the competitive programming community at DIU.

Volunteer – ICPC 2024 Dhaka Regional Contest 2024
ICPC Dhaka Regional Bangladesh

Volunteer – National High School Programming Contest 2026 Regional Round 2026
National High School Programming Contest Bangladesh

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

- Codeforces:** Specialist (Rating: 1432). **CodeChef:** NoObMin (Rating: 1429). **AtCoder:** NoObMin (Rating: 780).
- ICPC 2025:** Dhaka Regional Participant. **NSU IUPC 2026:** Onsite Participant.
- Unlock The Algorithm 2024:** 2nd Place (Preliminary), 7th Place (Final). **CodeTrap 2024:** 4th Place.
- Breaking Code 2.0 (MBSTU):** 9th Place. **Take-Off Programming Contest 2023:** 17th Place.

TECHNICAL SKILLS

Programming: C, C++, Python, SQL.

Algorithms & Core CS: Data Structures, Algorithms, Dynamic Programming, Graph Theory, Number Theory, Object-Oriented Programming (OOP), CFG.

Machine Learning: Machine Learning, scikit-learn, Neural Networks, Deep Learning, PyTorch.

Data Science: NumPy, Pandas, Seaborn.

Development & Tools: Next.js, Supabase, Prisma, GitHub, Linux, Bash, Web Scraping.

Productivity: Microsoft Excel, Microsoft Word, Microsoft PowerPoint, Google Docs, Google Sheets, Google Slides.

Platforms: Codeforces, CodeChef, AtCoder.

KEY ACADEMIC & PERSONAL PROJECTS

Routine Hub – DIU CSE Routine Scraper *Personal Project*
Built a web application that scrapes DIU CSE Department routine data and lets students easily view section-wise class schedules.

River Crossing Puzzle Game *Personal Project*
Developed an interactive river-crossing puzzle game with rule-based move validation and level progression.

Hospital Management System (DBMS Lab) *Team Lead*
Built a local SQL database system for patient records, doctor schedules, and medicine prescriptions.

Custom Compiler Design (Compiler Lab) *Team Lead*
Guided a team to build a working custom compiler using Context-Free Grammar (CFG) rules.

Command Line File Manager (Operating Systems Lab) *Solo Developer*
Created a command-line file manager using Bash scripting in a Linux environment.

Banking System (Data Structure & OOP Labs) *Lead Developer*
Created a banking application in C for account creation, deposits, and semester fee payments; later extended it using OOP concepts.
